

2667. create hello world function

```
class HelloWorld {  
    // Your program begins with a call to main().  
    // Prints "Hello, World" to the terminal window.  
    public static void main(String args[])  
    {  
        System.out.println("Hello, World");  
    }  
}
```

2666. Allow One Function Call

Using static Initialization

```
final class StaticInitializer {  
    public static int CALL_COUNT = 0;  
    static {  
        initializationLogic();  
    }  
    private static void initializationLogic() {  
        CALL_COUNT++;  
    }  
}
```
