2443. Sum of Number and Its Reverse

```
class Solution {
    public boolean sumOfNumberAndReverse(int num) {
        for (int i = num / 2; i <= num; ++i) {
            if (num == i + reversed(i)) {
                return true;
            }
        }
        return false;
    }

    private int reversed(int num) {
        int ans = 0;
        while (num > 0) {
            ans = ans * 10 + num % 10;
            num /= 10;
        }
        return ans;
    }
}
```

2654. Minimum Number of Operations to Make All Array Elements Equal to 1

```
class Solution {
    public boolean sumOfNumberAndReverse(int num) {
        for (int i = num / 2; i <= num; ++i) {
            if (num == i + reversed(i)) {
                return true;
            }
        }
        return false;
    }

    private int reversed(int num) {
        int ans = 0;
        while (num > 0) {
            ans = ans * 10 + num % 10;
            num /= 10;
        }
        return ans;
    }
}
```
